RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 40 pages. Original publisher: Champaign, Ill. : US Army Corps of Engineers, Construction Engineering Research Laboratory ; Springfield, VA : National Technical Information Service, distributor, 1999 OCLC Number: ocm44770787 Subject: Land use -- Management. Excerpt: . . . CERL TR 99 55 15 Multiple Scales EDYS contains three major modules that correspond to three major scales in ecosystems: Quadrat, Community, and Landscape. The Quadrat Module is the basic unit in the Community Module, and the Community Module is the basic unit in the Landscape Module (Figure 2). The Quadrat Module simulates ecological mechanisms and dynamics at the 2 2 small scale (1 m to 100 m). Most of the mechanisms in the EDYS model related to plants (growth, water and nutrient uptake, and competition) and soils (water and nutrient transport through the profile, decomposition) are implemented in this module. The Community Module focuses on spatial patterns and dynamic from the patch 2 (100 m) to the community (1 to 10 hectares) scales. These include spatial heterogeneity in soils, plants, and stressors among quadrats within the community, stressors such as fire propagation, grazing, and lateral flow of surface and sub-surface water and materials, and important spatial patterns such as vegetation cover, habitats, and topography. Figure 2. Quadrat-Community-Landscape Module linkages in EDYS. Multiple Quadrats are included within each community to represent small-scale ecological heterogeneity. Similarly, multiple communities are included in the landscape to represent medium-scale ecological heterogeneity. This item ships from La Vergne,TN. Paperback.
