C. Henderson, of the poultry division, College of Agriculture. Late molting hens, which are the best for breeding purposes, should be allowed to rest during the winter, because this is the period when they are renewing their feathers and rebuilding the fat and flesh which apparently are important in the production of hatching eggs. Heavy grain feeding is one of the best means of increasing the body weight of hens that are to be used as breeders. Mash should be kept before them at all times, even though the liberal grain feeding will tend to cut down the amount of mash that will be eaten. This will tend to keep the hens gaining in weight and put...

Reviews

Without doubt, this is the very best job by any article writer. It typically does not cost too much. You are going to like just how the blogger write this pdf.
