

Type 2 Diabetes: Causes, Treatment & Preventive Strategies

By Isidoros Calpis, Stefanos Frangopoulos

Nova Science Publishers Inc. Hardback. Book Condition: new. BRAND NEW, Type 2 Diabetes: Causes, Treatment & Preventive Strategies, Isidoros Calpis, Stefanos Frangopoulos, Type 2 diabetes is a major health problem reaching epidemic dimensions. Its complications, micro- and macrovascular, have a great impact in health economics as well as in the diabetic patient's quality of life. In this book, the authors present current research in the study of the causes, treatment and preventive strategies of type 2 diabetes. Topics include the molecular genetics of type 2 diabetes mellitus; the pharmacogenetics and personalised therapy of oral antidiabetic drugs; gastric bypass and sleeve gastrectomy as effective treatment strategies in obese patients with type 2 diabetes; ACP1 genetic variability; and, the study of biomarkers for diabetes mellitus type 2 and the role of high dose thiamine.

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Ally Reichel**

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).
